Whiteout 27K will impress by his free movement, wide base and fault free structure with natural softness and style. If you are looking for a sire of show stock, quality breeding animals or to use on black cows to produce those popular blue roans, Whiteout 27K will get it done. A full brother was the 2022 Farm Fair and Agribition Grand Champion bull for Foxtail Livestock. Whiteout's dam, Shadybrook Valentine 75F was a top seller as a calf at our 2018 sale and she went on to be a successful show heifer for Sweetgrass Ranches. We purchased her back at Linda's dispersal sale bred to Hill Haven Fire Storm 28C. She will be entering our donor program next spring. It is also noteworthy that Valentine 75F is a direct descendant of Scotsmorr Valentine 50H who was one of the earliest foundation females purchased by Shadybrook Farm in the mid 1970's. That is proof of the maternal strength that will breed through the generations to produce the top Females and Males of a breed. In his first time out, Whiteout 27K was slapped Grand Champion Bull at Expo Boeuf, Victoriaville, Que. He'll be one to watch for in the Supreme at CWA!

Leah 1L is what we are striving to produce here at Holland Lane. Her Evolution dam was purchased from Shadybrook with high expectations, knowing that she was safe to Times Square. Leah is long-spined, deep-ribbed and has a bunch of 3 dimensional shape. You have to love her extended front end and her ability to move like a cat. AOB Champion at Owen Sound Fair, on just her second trip to town. We should be keeping this one, but we wanted to bring our best to Agribition. With the Junior National Show being in Saskatchewan in 2024, this one is a sure bet to chase the banners for you! The bonus is, she will also make a great cow after her show career is over.

News Flash!!! Leah 1L is now a 3-time Grand Champion, as well as a Supreme Shorthorn Champion, as of Erin Fair Oct 8! Juniors, don't miss your chance to buy this proven show machine!

JSF Times Square out of a Hot Commodity x Shadybrook Platinum. It doesn't get much better than that if you want a female with bred-in longevity! Another one we should be keeping, but she is so much like the Leah 1L heifer, that we couldn't decide which one we liked better, so we brought both here to Agribition for you to decide. Juniors, pay attention, as this one too, will chase the banners in Saskatchewan next year.

Knay Knay is a female that you can build an entire program around, to say we are excited about her is an understatement. She is big volumed, big hipped and big topped, but is still extremely feminine and sound made. She has been extremely competitive in the show ring winning countless divisions and champion banners. Most recently she was crowned the 2023 Canadian Junior Shorthorn Supreme National Champion Female. Selling the right to flush this incredible breed changing female. We will offer the successful bidder the right to one flush to the bull of your choice or split two flushes to two mutually agreed upon bulls. If the split flushes are selected that opens up the entire First Class semen tank to be chosen, including our most recent purchase, Gilman's All In 6K.

Flush will be completed in Spring of 2024. Guaranteeing 6 freezable embryos with no cap. Half of purchase price must be paid at sale with the rest payable at time of flush

A nice mating of two powerful individuals who are making moves on two different continents. Lassie 2024 needs no introduction to the Shorthorn world being one of the highest revenue cows in modern Shorthorn production; she has well established herself in the USA as the preferred performance dam of the American population. This cow with proven, elite breeding figures also stamps phenotypic excellence into each one of her progeny, just like the \$85,000 son, Gilman's Greens Fork 50K, now at Shadybrook. The sire of these embryos, Heritage P73, is a moderate statured Australian sire who was a top seller for Stry's. He sires rugged made, stout cattle with that extra shot of muscle shape and hip. Incorporate these genetics for a strong genetic base that delivers outcross options and true horsepower for genetic improvement.

Embryos housed at StockVets, Rensselaer, Indiana, USA.

Selling one package of four sexed heifer, IVF embryos with a guarantee of one pregnancy.

Sired by our new herdsire, Gilman's Greens Fork 50K E.T. with reverse sorted semen. The embryos are stored at Boviteq Canada and are Exportable. The resulting ET calves will be 98.2% in the CSA herdbook. This genetic package combines the powerful maternal influence of several exceptional breed leading cow families. Notably Waukaru Lassie 2024, Shadybrook Veronica 92Y as well as the Juanita's. Shadybrook Juanita 97C has proven herself to be a consistent producer of excellent quality progeny by different sires. Two ET daughters were among the top selling calves in our 2022 Sale and another is our lead show female this year. Gilman's Greens Fork 50 K was purchased at The Summit Sale at the Cattlemen's Congress in January, where he was admired by cattleman of all breeds. He is homozygous polled and free of all genetic conditions. Sired by the popular Byland Flash 9106 and out of Waukaru Lassie 2024, one of the breeds most prolific and value producing donor dams.

4 Grade 1 Embryos. Exportable.

Leading Lassie 5G has developed into one of our very best donors, despite having a serious shoulder injury from an injury during a windstorm a few years ago. She has continued to develop into a massive female with a superb udder and incredible fleshing ability. She is an ET daughter of Waukaru Lassie 2024, who is a legendary female in the breed. A few years ago, she was ranked #1 in the breed for every measurable trait, She has produced numerous excellent offspring. When Bell M Foreman 30A was named Grand Champion Bull at Agribition a few years back, I felt that he was the most functional and sound bulls I had ever seen with this award. He had tremendous thickness and moved like a cat as well as being incredibly loose hided, which is a trait that most of the easiest fleshing animals possess. In my opinion, he was one of the most underrated herd sires in the breed for too many years. For me, it is very pleasing to see Foreman being recognized in recent years.

These embryos offer you an opportunity to add genetics economically to your herd that will pay dividends for many years into the future. We will offer the buyer a minimum of 2 pregnancies at 70 days post implantation providing an experienced embryo technician is used.

In March I took a dream vacation to Australia and found a dream bull! After driving over 2,000 km on the wrong side of the road and looking at over 800 bulls I stopped at Ronelle Park/Trojan Shorthorn Stud. I went into a paddock of bulls and found a strawberry roan bull named Slurpie and knew I had to bring him to North America. He's about flawless in his phenotype, and is backed up by an excellent Sire and Dam. They took him to the National Sale in June at Dubbo where he was selected Res. Grand and sold for a new Australian record of \$106,000. While there he scanned 7.8 IMF with a 21" REA. He is Homo Polled and big nutted to boot! If you want to lead the way in the next century don't let this opportunity pass! We are only offering a very limited amount of semen and this is the only semen to sell in Canada this year!

Prepotent. Shorthorn. Breeding. Bull. Further proven every day as his progeny continue to not just impress, but, excel. Backed by the most valuable cow in the breed today, he breeds like her, as he should, all the while with the calving ease of his sire, Hector. What sets him apart? Palermo is more than just a calving ease bull. He is the calving ease KING of the breed today. His robust, vigorous calves will hit the ground running. As they develop, his females will be some of your most feminine, with a near perfect head and ear set, all the while being incredibly easy fleshing, and, as yearlings, they will get pregnant. His bulls will grow into powerfully constructed, stocky beef machines that look like herd sires from a young age. Further proof of this will be realized in the spring of 2024 when JSF & PVF roll out a set of PALERMO sons for the AGES. If you want to set yourself apart, and, be a step ahead, enter Palermo. Semen stored at Eastgen, Guelph, ON

The 2021 Cattlemen's Congress Reserve Grand Champion has proven himself yet again. His first daughter to sell in the Revival Sale last year brought \$46,000 and his first heifer crop averaged \$15,000. In this year's Revival his top-selling daughter, Lot 1A, commanded \$37,500 and six daughters in the sale averaged \$17,000. In recent breeding seasons Worldwide has been used on some of the most elite females in the Shorthorn breed. Semen is stored at EastGen, Guelph, Ontario. Buyer is responsible for shipping costs.

The first calf crop, out of the \$60,000 US High Selling Bull at the 2022 Durhams in the Dakotas Sale, has hit the ground across Canada and the US and one of the consistencies they have is that they are IMPRESSIVE! The composition of JSF Manhattan 194J ET – depth of pedigree, structural correctness, immense quarter with massive hip, masculinity, yet attractiveness. Manhattan has exceeded all our expectations and has transferred his impressive traits onto his progeny. His calves are coming extremely easy, with a lot of growability. They are modelling Manhattan with structural soundness, length of spine and extreme hip and quarter. The females are extremely fancy and feminine looking, and the males are masculine with good testicular development. It does not matter what color they are coming in – red, white, roan. They are all PLAIN GOOD. There will be a considerable number of Manhattan calves coming in 2024 and we expect them to be just as impressive. Do not pass up the opportunity to access outcross genetics that will enhance your breeding program! Semen is stored at Alta Genetics. Buyer is responsible for shipping costs.

Byland Flash, a prominent beef bull, is leaving a mark in the Shorthorn breed with his remarkable success in siring outstanding cattle. His progeny is known for their extra length of spine, excellent marbling, docile temperaments and exceptional performance. Flash has sired numerous champions for prominent breeders across the US. Add that the best calves born here in 2023 on the 2 year old cows were sired by Palermo on Byland Flash daughters! This is your only opportunity to purchase sexed heifer semen by Byland Flash in Canada this year.

Semen stored at Great Lakes Sire Service, Bronson, MI. To be shipped Eastgen post sale.

Top Hand has done a nice job in both the USA and Canada siring males and females of significant influence. These cattle have so much structural integrity and are as long as trains. Check out his suite of carcass traits; it doesn't get much better. But he is so much more than a carcass sire. Top Hand shows up in the pedigree of some of the highlight young sires in the breed today, like BSG Index in Indiana, and JSF Foresaken at Studer's in Iowa. And who could forget Bell M Foreman - one of the best white bulls to run in North America in some time. Complete cattle. Solid cattle. Promising genetics.

There are few bulls of any breed that can accomplish what this masterful sire has done, and that is sire daughters that have gone on to be National Champions, and also sire daughters that excel in the commercial setting where Stayability is paramount for program profitability. Lad 13N daughters are big bodied, big footed and stout featured. He moderates frame score and packs in visual muscle, making highly marketable stock. Docility is a key feature of these genetics. Look into this semen package for all around satisfaction.
